BUILT TO LAST

with Porcelain Enamel Technology

Guarantee
On Inner Tank

100% reliable, Venus water heaters have sleek exteriors that complement their performance. With a unique Porcelain enamel glasslined tank, Venus water heaters not only provide excellent heating but also last longer and utilise lesser energy than ordinary water heaters. For a unique bathing experience, look no further than Venus.

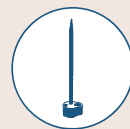

Porcelain Enamel Glass Lined Tank: Manufactured in a modern, automated plant using European Technology. Protects the tank from rust and corrosion.

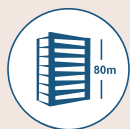

PUF Insulation : Thick polyurethane foam insulation reduces the standing heat loss and keeps water hot for much longer.

Tubular Element : High quality heating element for long life and performance.

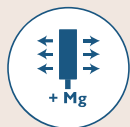

Stem Thermostat : Senses water temperature quickly and precisely protect against over heating safety function.

8 Bar : Highest pressure rating of 8 bar for use in multistorey buildings or with pressure pumps.

Thermal Cutout : Backup safety device cuts off power at 100°C. Prevents overheating.

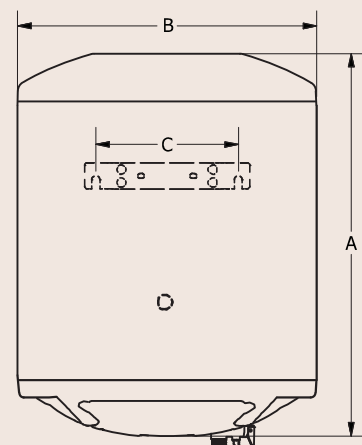

Sacrificial Magnesium Anode : A special device to enhance the corrosion protection of the tank by means of "Cathodic action".

STYLISH, EFFICIENT AND SAFE

Safety, Efficiency and technology combined in one water heater

3cm thick
PUF insulation

Heat Retention
Technology

55
YEARS

IS:2082

Introducing CELO the most versatile water heater Safety, efficiency and technology combined in one water heater.

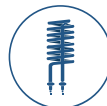

Porcelain Enamel Glass Lined Tank: Manufactured in a modern, automated plant using European Technology. Protects the tank from rust and corrosion.

Glasslined Incoloy 800 element: Withstands temperatures up to 1000°C. Long lasting, even in hard water. Reduces scale formation. Prevents premature element failure (except 6 litres).

3cm thick PUF insulation: 3cm thick (PUF) insulation keeps the water hot for a much longer time and reduces energy consumption.

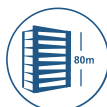

Tubular Element : High quality copper heating element for long life and performance (for 6 litres only).

Heat Retention Technology : No Thermal Bridge between the Tank and the external Housing, there by enabling 16% lower Thermal Losses.

Triple Security : Multi-function Safety Valve, Capillary Thermostat & Thermal cutout.

8 bar pressure: Suitable for pressure pumps and multi-storey buildings.

Temperature Display : The display will real - time display the current temperature.

Sacrificial Magnesium Anode: A special device to enhance the corrosion protection of the tank by means of "Cathodic action".

7 years guarantee on inner tank

Product Specification

Rated Wattage	2000W
Rated Voltage	230V, 50Hz, AC
RPM (at High Speed)	2400
Motor Wattage	22 W
Current	10 Amps.
Thermal Cut-out / Thermostat	Applicable
Product dimension (L x W x H)	360mm x 220mm x 115mm

*Specifications subject to change without prior notice.

FAN HEATER

Venus Fan heater has convenient features that ensures ease of use. The heat setting and the temperature control knob will enable you to regulate the amount of heat you require. The hot air outlet facilitates ventilation. This heater can be used as a heater in winter and as a fan in summer making it an all-weather product round the year.

The body of the heater is rugged plastic which is Fire retardant. The metal grill will ensure the safety of the copper-element and is free from rusting. Compact in design. these heaters are easily portable and convenient.

FEATURES

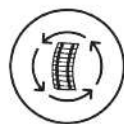

5 Level Protection

Durable Copper Motor with thermal overload protector

2 Convenient Heat Settings (1000W/2000W)

Heavy Metallic Front Grill

Compact design with Vertical / Horizontal Placement.

Portable Carry Handle

Product Specification

Rated Wattage	2000W
Rated Voltage	230V, 50Hz, AC
Fan Motor Wattage	30W
Fan Motor RPM	2300RPM
Thermal Cut-out / Thermostat	Yes
Product dimension (L x W x H)	250mm x 118mm x 240mm

OIL FILLED RADIATORS

Works by heating the oil inside the radiator which then heats the surrounding air by process of convection. Provides safe & comfortable heating and does not reduce the humidity as much as other type of heaters. Curved fins are used for faster and efficient heat transfer with 400W PTC heater fan for instant heating. OFR retains heat for longer duration.

FEATURES

Curved fins for faster and Efficient heat transfer

Easy Mobility
(Castor wheel)

Safe and Comfortable Heating
